

Dexcom[®]
CONTINUOUS GLUCOSE MONITORING

CGM can transform the way you live your life

Dexcom G5[®] Mobile Continuous Glucose Monitoring (CGM) System:

Mobile monitoring. Fingerprick-free dosing*. More living.

Get accurate, real-time readings

Our outstanding accuracy offers you reliable results that you can trust.^{1,2}

Get the good night's sleep you all deserve*

With 24-hour readings and glucose alerts and alarms, you can finally get a full night's sleep with Dexcom.

Stay close and connected with friends and family

With our Dexcom Follow[®] App, you can share[†] your readings with people who can support you.

Real-time alerts when your glucose levels are changing*

If you or your child are hyper/hypo unaware, our real-time alerts and alarms can let you know when something is happening.

Fingerprick-free dosage adjustment

Adjust your insulin dose without blood glucose fingerprick checks*

With our Price Plan, you can experience the Dexcom G5® Mobile at the most affordable price.

Until now, getting started with real-time CGM required a significant investment. Our Dexcom G5® Mobile Price Plan provides savings whether you are a new or existing customer to Dexcom, making CGM **more affordable than ever.**

*If your glucose alerts and readings do not match your symptoms or expectations or you are taking medications containing paracetamol/acetaminophen, you should perform a finger prick to confirm your blood glucose level. A finger prick is needed every 12 hours to calibrate. †Internet connectivity required for data sharing. ‡Following requires the use of the Follow App. †Followers should always confirm readings on the Dexcom G5® Mobile App or Receiver before making treatment decisions. †When planning your first order you may substitute 1 box of 4-pack sensors for a G5® receiver. ‡For a list of compatible smart devices, please visit www.dexcom.com/compatibility. © 2017 Dexcom UK & Ireland.
